

Master of Science in Medical Physics

medphys@sci.ui.ac.id

Program directives

Vision

To be a center of excellence in research, education, and training in medical physics in the national and international level

Mission

To develop the highest quality programs of teaching and research and to produce medical physics graduates to fulfill national and international demand

Prospectus

Alumnae of our program primarily excel in their career as clinical medical physicists, radiation protection experts, state regulators, national bureaucrats, as well as academics and researchers dealing with the advancing world of medical physics. Career as product experts at medical devices companies are promising as well.

Facilities

Students are entitled to all the facility of the Department, Faculty, and University. Access to library and online literatures (academic journals) are provided. The laboratories provides access for students to devices and tools for research. The equipment and practical are managed in 5 laboratories :

- ❖ Radiation Physics Laboratory
- ❖ Medical Physics Laboratory
- ❖ Treatment Planning Laboratory
- ❖ Computational Medical Physics Laboratory
- ❖ Biophysics Laboratory

Sharing Facilities

For clinical attachment and practical session, we collaborated with several hospitals through Memorandum of Understanding i.e. Cipto Magnankusumo hospital, Dharmas Cancer Center, Siloam Hospital Semanggi, and Pasar Minggu hospital.

Faculty Members UI

Prof. Dr. Djarwani S. Soejoko | *Medical physics and Biomedical Material*
Prof. Dr. Neng Tine Kartinah | *Pato-Anatomy and Physiology*
Supriyanto A. Pawiro, Ph.D. | *Radiotherapy Physics*
Dr. sc. hum. Dwi Seno K. Sihono | *Radiotherapy Physics*
Dr. sc. hum. Deni Hardiansyah | *Nuclear Medicine Physics*
Nurlely, Ph.D. | *Biophysics, Biomedical Material, Biosensor*
Prawito Prajitno, Ph.D. | *Computational and Image Processing*
Sastra Kusuma Wijaya, Ph.D. | *Biomedical Instrumentation*
Kristina Tri Wigati, MSc | *Diagnostic Radiology Physics*
Lukmanda Evan Lubis, MSc, F.Med | *Diagnostic Radiology Physics*
Akbar Azzi, MSc, F.Med | *Radiotherapy Physics*

Visiting Professors/Lecturers

Prof. Dr. Dietmar Georg | Medical University of Vienna, Austria
Prof. Dr. Wolfgang Birkfellner | Medical University of Vienna, Austria
Prof. Dr. Hilde Bosmans | Catholic University of Leuven, Belgium
Prof. Dr. Gerhard Glatting | Ulm University, Germany
Markus Stock, Ph.D. | Particle Therapy Center, MedAustron, Austria
M. Hafiz Zin, Ph.D. | USM / AMDI
Rafidah Zainon, Ph.D. | USM / AMDI

1st and 2nd Semester (Mandatory Courses – 20 credits)

Pato-Anatomy, and Physiology (2 credits)
Advanced Radiological Physics and Dosimetry (2 credits)
Application of Radiobiology (2 credits)
Medical Imaging Physics (2 credits)
Radiotherapy Physics (2 credits)
Computational Medical Physics (2 credits)
Laboratory work (2 credits)
Sensor and Biomedical Instrumentation (2 credits)
Biomedical Physics (2 credits)
Ethics of Medical and Clinical Medical Physics (2 credits)

2nd Semester (Elective Courses – 6 credits)

Radiotherapy Physics Track

Imaging and Radiotherapy Planning Technology (3 credits)
Advanced Radiotherapy Techniques (3 credits)
Radiation Protection and Safety (2 credits)

Imaging and Nucmed Physics Track

Advanced Medical Imaging Physics (3 credits)
Advanced Nuclear Medicine Physics (3 credits)
Radiation Protection and Safety (2 credits)

Biomedical Physics Track

Bioelectromagnetism (2 credits)
Biomedical Materials (2 credits)
Biological Material (2 credits)
Biomedical Optics (2 credits)

3rd Semester

Scientific Publication (2 credits)

4th Semester

Master Thesis (8 credits)

Title Awarded

Upon the completion of their study, students will be awarded the title Magister Sains (M.Si.)

The Structure

Master of Medical Physics study program UI is the first master medical physics study program in Indonesia. For details about master of medical physics study program, see [http://](http://physics.ui.ac.id/academic/master-in-medical-physics/)
<https://physics.ui.ac.id/academic/master-in-medical-physics/>

CPD and training

Students are able to take part in Continuing Professional Development programs in frequent workshops, seminars, and scientific forums held by the program in conjunction with national and international Medical Physics communities.

Opportunities to be involved in professional training (Clinically-Qualified Medical Physicist Residency training) is available for students. Students can be enrolled as residents either after graduation (regular residency) or during the studentship (hybrid program). The residency program complies with IAEA recommendations.

Entry requirements

For admission into M.Sc. in Medical Physics study program, applicants must have at least an undergraduate degree in Physics or Nuclear Engineering with strong foundation in Physics and Mathematics.

Application procedure

Admission exam is held by Universitas Indonesia's central admission office. For schedules and procedures, see <http://penerimaan.ui.ac.id/> or <http://international.ui.ac.id/>.

Funding opportunities

- ✚ Research Grant: cumsumable goods, national or international seminar and publication fee
- ✚ CMPB-UI Fellowship: Partial tuition fee
- ✚ Potential source funding: IAEA Marie Curie Fellowship Program, DEXA scholarship, IsDB scholarship, Ministry of Health Scholarship Program, Beasiswa Unggulan, and LPDP scholarship

Further information
